

For sea kayak rentals from 2 days and longer - Kayak More Tomorrow's Outfitting Service!

Planning a sea kayak trip - whether for a few hours or a few weeks - requires information! Where do you go? What's a good route? Where are the best campsites? What about currents? What to wear, what to bring, etc. This is where Kayak More Tomorrow comes in!

Kayak More Tomorrow's sea kayak specialists were the first sea kayakers to paddle Norway's coastal waterways; we continue to paddle these waterways every day. This has provided us with an enormous wealth of information on Norway's coastal waters from a sea kayakers point of view, and as well, having operated sea kayak centres in Norway for over 20 years has given us a clear understanding of the needs of sea kayakers paddling this majestic coastline.

Outfit your Sea Kayak Trip with KMT!

We have provided comprehensive route information and outfitted self-guided sea kayakers for over 20 years along Norway's coastal waters. KMT is your best choice for a hassle-free self-guided sea kayak trip in Norway.

Outfit only what you need! Bring your personal gear and get the rest from us. We have divided up our gear into individual categories so that you can rent only what you need.

And, most importantly included in the price is comprehensive route planning, advice and local knowledge from our sea kayak specialists and a thorough pre-trip briefing prior to you pushing off the beach.

Our outfitting service begins with our office staff guiding you as you plan your journey and then when you arrive at your departure location our sea kayak specialists will brief you in-depth on the following:

- the route – plot out the entire route in detail on a set of maps
- camp sites – with GPS coordinates
- fresh water access
- grocery resupplies
- climatic and sea conditions
- tide and current chart with local tips and information
- weather forecasts
- paddling with the local tides and currents
- seamanship and paddle safe information
- equipment usage and packing

We have a solid fleet of sea kayaks and related equipment through a full range of camping equipment, as well as stoves, camp kitchens; also, an additional option is our trip menu with all the groceries necessary to make delicious meals can be arranged for your trip.

Our sea kayaks and equipment have all been thoroughly tested in the rugged conditions of the Arctic, this, to ensure that you are provided with the best gear available for your sea kayak adventure.

Transport Service:

Our transport service gives you endless options when planning your paddling journey on Norway's Lofoten Islands or Helgeland's Coast; offers you the following benefits:

- Full flexibility
- One-way trips
- Airports transfers

KMT's vans and trailers are available to pick-up and/or drop-off sea kayaks, equipment, and people along Norway's Lofoten Islands & Helgeland's Coast.

Transport Service Pricing: Norway is Europe's most expensive country! And, with the taxation level on vehicles between 150 – 175% of the purchase price, and a 90% tax rate on fuel combined with Europe's highest wages then, it is going to be expensive to drive in Norway! To compensate for this, we try to keep our transport service prices at a level that just covers our costs and with the current price of fuel in Norway it works out to about € per km.

Acknowledgement: the price of all Kayak More Tomorrow 's Outfitting is based on all participants completing (to KMT's satisfaction) and signing Kayak More Tomorrow Outfitting Client Details – Term & Conditions – Waiver Release & Indemnity,

Meal Plan – Trip Menu and all the Groceries for 2 persons

Kayak More Tomorrow's Sea Kayak Outfitting Meal Plan is chosen from an International menu. We have developed our food service program with a focus on sea kayak touring, which means that each meal has been designed to pack well and is low in volume, this to account for the limited storage space available in a modern sea kayak.
